### LIGHT EFFECTS LEAK KIT

The Light Effects Leak Kit is a bundle that includes 42 different actions and a special bonus helper script. This script allows the actions to run and look great in images regardless of the dimensions.

The advantage of this kit being actions instead of .JPG/. PSD to put in top of your images is that the result of each action is completely editable, from the color, size, position, blending mode, etc. So basically you can do hundreds of combinations, I'm just presenting 42 presets, you can make your own.

Your image won't be altered in color (unless you choose some of the actions that have the option to do so) so you can run the actions after you're done editing or combine them with any other of my actions and it will look awesome!

Do you have a special light leak you would want to apply to your images but you haven't been able to achieve it? This kit is for you! it has effects from basic leaks, flares, light streaks, lighting changes, and special combos!

And yes, this works in Photoshop Elements!

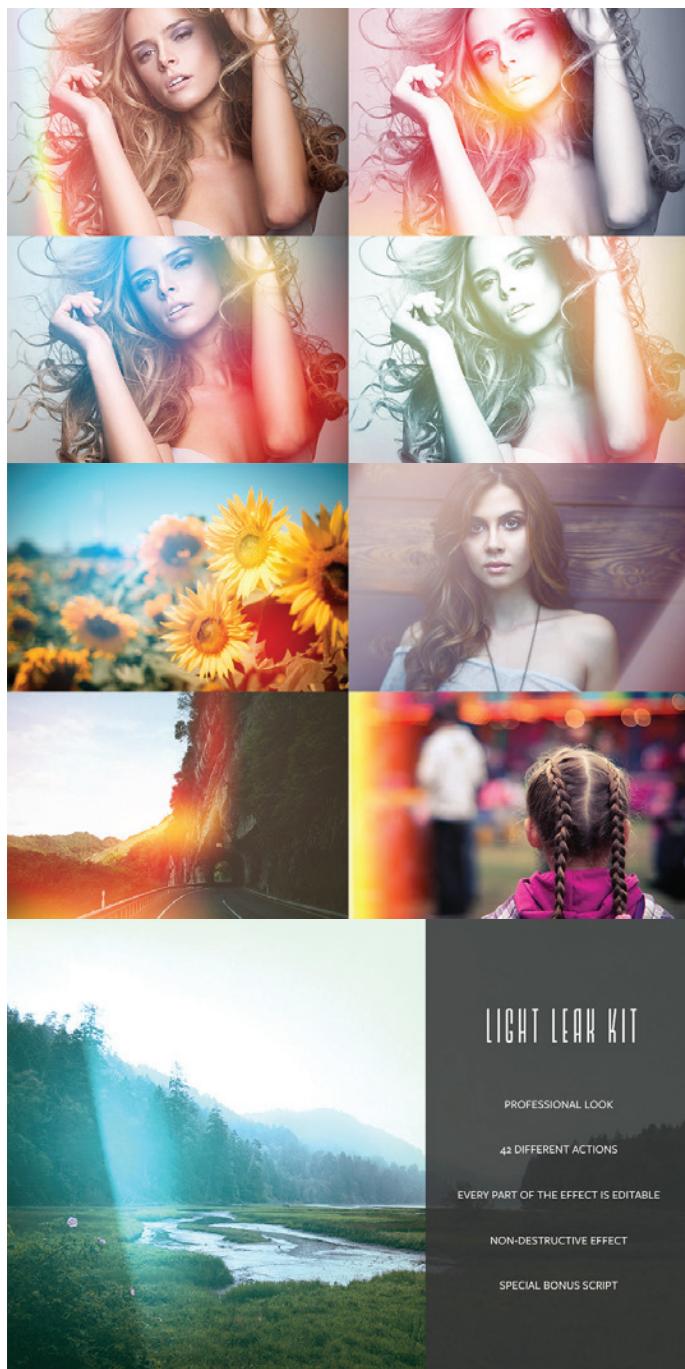

If you find a light leak that is not included in the kit, let me know and I'll build an action for it and include in an update, it's a win-win situation.

Included in this set:

- 42 actions + bonus helper script
- It can be combined with any other actions as it doesn't modify the color.
- Non-destructive effect.
- Very easy to use, but a Help file is included.
- Final effect is editable.
- Works with Photoshop in any language.
- Built and optimized to have the fewest steps possible, making the actions run fast!
- Works in Photoshop Elements

Zipped File Size: 71 KB

File Types Included: .ATN, .JSX

### TALL ABBEY + ORNAMENTS!

Tall Abbey was based on my partner's handwriting and with a few tweaks here and there it turned into one of my all-time favorite fonts. Recently, (this week) I have extended Tall Abbey's glyph range to cover all Latin 1 glyphs. In addition to this, I've added a variety of hand-drawn bits and pieces that you can use to build your own custom designs that beautifully complement this tall font.

The extras are stored within an Illustrator (.AI) file. If you require another file type, don't hesitate to get in touch. I'm always keen to help. The font comes within a ZIP file and is in both .OTF and .TTF formats.

### PAPRIKA

We're excited to introduce our beautiful script typeface Paprika!

Paprika is a cute script with a slightly messy touch. It is inspired in the modern calligraphy trends, therefore, sometimes it can be seen as an elegant typeface or as a spontaneous font; it depends on the context in which it is being used.

This is the first W script, making our catalogue wider and more eclectic, all thanks to our new team member Isabel La Rivera.

Paprika includes capital swashes, contextual ligatures, alternatives letters, and extras, making this project perfectly suited for several areas of graphic design.

Included in this set:

- Swashes
- Discretionary ligatures
- Alt figures
